

Highly Accurate Non-contact Pyrometer With Analog Output and Digital Interface

CE 0°C to 1000°C

AL30

AL30 Digital Infrared Pyrometers with Thermopile Sensors provides the advantage of noncontact temperature measurement of non-metallic surfaces, painted, coated or anodized metals etc. **AL30** IR Pyrometer is designed for easy integration into standard 4 wire system. This format combines the high accuracy of digital signal processing with the simple connection. **AL30** Infrared Pyrometer is used for target temperature ranging from 0°C to 1000°C. The electronic assembly is protected by IP 65 rugged stainless steel housing.

AL30 IR Thermometer is provided with USB 2.0 connector with cable. The Pyrometer can be powered through USB port. In this case no external power supply is required (24V DC requires for operation of analog output laser on and RS-232 / RS-485 output).

Spot Sizes

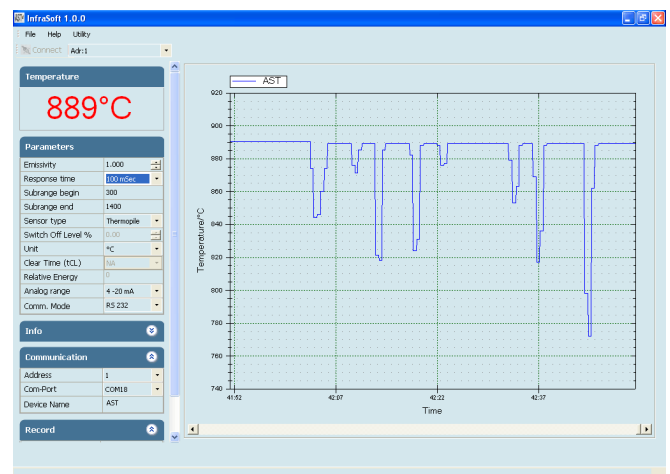

Software "Infrasoft"

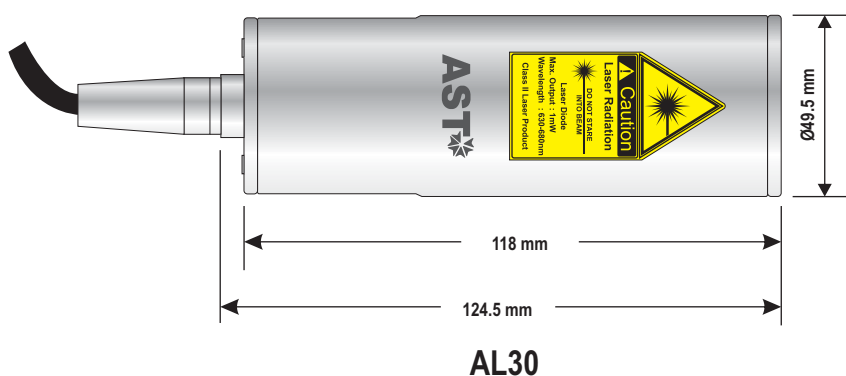

AST "Infrasoft" software is under standard scope of supply. It offers possibilities of connecting three pyrometers simultaneously for parameter setting, view real time graph, offline graph and to evaluate measuring data. Communication between the pyrometer and the software is implemented via a cable connected between the pyrometer and the PC serial port. It comes with record feature, spot size calculator and parameter settings features.

Some of the parameters adjustable via software are

- Emissivity, Response Time,
- Clear Time (Peak Picker),
- Analog Output,
- Sub Range,
- Unit Of Temperature (°C/°F),
- Communication mode (Comm. mode).
