

A450C+ FO-PL is a highly accurate digital two colour Fibre Optic IR Pyrometer from FO-PL series. It provide high performance and low maintenance of non-contact temperature measurement in demanding industrial and R&D environment. The pyrometer measure the temperature in object by calculating the ration of the energies at 2 different wavelength bands. The ratio technique eliminates and reduces errors in temperature measurement caused by changes in Emissivity, Surface finish and energy absorbing materials such as water vapour etc.

The IR pyrometer parameters can be selected via the keypad on the back panel. The setting are displayed on the OLED display. In the measuring mode real time temperature is displayed in pyrometers with video module real time color video measuring temperature and emissivity is displayed on the television screen. The pyrometer is equipped with RS-485 output, analog output 0/4...20mA.

Software "Infrasoft"

AST "Infrasoft" software is under standard scope of supply. It offers possibilities of connecting three pyrometers simultaneously for parameter setting, view real time graph, offline graph and to evaluate measuring data. Communication between the pyrometer and the software is implemented via a cable connected between the pyrometer and the PC serial port. It comes with record feature, spot size calculator and parameter settings features.

Some of the parameters adjustable via software are

- Emissivity, Response Time
- Clear Time (Peak Picker)
- Analog Output
- Sub Range
- Unit of Temperature (°C/°F)
- Communication mode (Comm. mode)
